[Art of Science 2006 Winners](#)

Posted on Thursday 8 June 2006

The winners of Princeton's second annual [Art of Science competition](#) are on their site:

There were several types of submissions. The [winner](#) is an artistic interpretation of mitosis, but a lot of images are part of actual data or experiments that just looked interesting.

The [winner in the video category](#) is a merged video of a physicist writing on a blackboard and a fluorescent stain of embryonic development of a fruit fly.

[previously: [2005 winners](#)]
